DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 7,8,12 stand withdrawn from further consideration pursuant to 37 CFR .142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply ed on 12/5/05.

Claim Rejections - 35 USC § 102

.Claim2-4, 6, 10-11, 16 –20 stand rejected under 35 U.S.C. 102(b)as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over VON KOHORN et a14160335

see example 1; the plastisol constitutes the instant now claimed mixture; as we are shown how to arrive at this, we can improve for the particular pest of concern- use a different insecticide & pheromone/attractant. The fact that this is WITHIN a laminate is not precluded by any of the instant claims as written in comprising guise, with a mixture containing the inventive material/matrix;

solid matrices (figures) as sandwiches of PVC, plasticizer-diethyl pthalate, and thickener mineral, of plastisols with insecticide and attractant are provided at example 2, to provide sustained release. Pheromones include (claim 13) boll weevil control (Table II, column 19) grandlure, with insecticide dichlorvos (DDVP-column 21, top). Sterilant are at column 14-16, at least one active is seen (claim 4) thus, insecticide sterilant would be obvious to the artisan to incorporate, as of instant claim 6.

A s to claim 20, the “containing” opens the language again, & we envision the claimed matrix within the VON KOHORN laminate; it still meets the instant language. The modification applicant argues does not preclude release of vapor from VON KOHORN'S DISPENSERS.

Claim Rejections - 35 USC § 103

Art Unit: 1615

Claims 2-4, 6, 10-11, 14-20 stand rejected under 35 U.S.C. 103(a) as being unpatentable over VON KOHORN 4160335 in view of ROWE- 2775994 and OGAWASARA.- 3888830

Response to Arguments

Applicant's arguments filed 11/27/06 have been fully considered but they are not persuasive..

Applicant's arguments were considered in the rejections sustained , above. The claim language does not preclude the prior art laminates & matrices, because the invention can be within a package or sandwich or laminate, as of Von Kohorn, for example. The use of adjuvant ingredients for the purpose for which they are intended is not a basis for patentability- the non-analogous art comment is not persuasive for consideration of the use of these materials; they show that polymer preparation reasonably utilizes these materials, regardless of intended use of the final product.

Where persuasive, rejections have been withdrawn, but since there is no basis for allowance, the methods remain withdrawn.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1615

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
